

Seamless Integrations for STRUCTURE

Proposal & Estimating Integrations

Measure Square, Callidus, SafeHarbor, SpecID → QPE

These powerful estimating tools generate spreadsheets with material quantities, scope of work, and cost required for proposals. Users can quickly upload these spreadsheets into **QPE - Bid Entry**, streamlining the bidding process.

- **SpecID** enhances submittal processing, allowing customers to simply note in **CF** when submittals have been sent.
- **SafeHarbor** supports the import of both **quote headers and line-item details**. Users leveraging SafeHarbor often complete their bid process within the platform and only transfer **approved jobs** into STRUCTURE.

Project Management Integrations

SiteFotos → Access from PJC

Within **PJC**, users can easily access **SiteFotos** with a single click, taking them directly to the job's photos on the SiteFotos website. For seamless functionality, STRUCTURE requires accurate job location data.

Procurement & Payables Integrations

Kojo → PO Import

Kojo simplifies procurement by generating a structured spreadsheet containing **purchase order headers and details** for various vendors. These files can be imported directly using STRUCTURE's **System Imports**.

AvidXchange → Payables Import

AvidXchange also provides **two spreadsheets**—one for **invoice headers** and another for **distribution details**. Using **CF Data's conversion tool**, users can effortlessly import these into STRUCTURE via **VVE Import**.

Payroll Integrations

Payroll Services → JXE Payroll Import

STRUCTURE accepts a spreadsheet with job hours that can be uploaded to JXE. Currently customers use various outside services such as ADP, Miter, Heartland, Exakttime to process their payroll but will upload time to STRUCTURE.

Service & Financial Integrations

Service → AR Import

Users can pull **accounts receivable** data from **Service Titan, ServicePro, ServiceFusion** or any other CSV file, then map the necessary columns for seamless import into STRUCTURE using **System Imports**.

Imports in STRUCTURE

JMT/WMT - Material Master Maintenance

Update/upload to the material database using **JMU – Import from Excel Spreadsheet**. Create the spreadsheet from existing material by exporting **JRM – Material Report Generator**. Or Support will supply you with an empty spreadsheet.

JEQ – Equipment Maintenance

Update/upload to the equipment database using a Support supplied spreadsheet via new PROC with version 18.10.04, **JEI – Equipment Import**.

JXE - Labor Time Entry

This information can just stay in job cost or can be updated to the payroll application. STRUCTURE will provide a spreadsheet used import cost time entry. Spreadsheets from payroll services can be converted by STRUCTURE to fit our format prior to importing. ADP, Mitre, Heartland, and other construction payroll companies are used now.

JJE – Job Entry (Maintenance)

Whether starting a new company, or have a long list of change requests you need to upload, the job entry screen offers a import function, to populate all the fields on the JJE screen.

JBA – Job Cost Budgets

Import your budgets from accubid or any estimating software. STRUCTURE has a supplied spreadsheet to import your phase, categories, types, and budget dollars and hours.

If using the quotes and proposals applications, jobs will be created with just the budgets needed from your quote.

JFE – Schedule of Values

STRUCTURE supplies a spreadsheet to quickly upload your schedule of values for your AIA billing. If using Textura, STRUCTURE can convert to the needed format.

If using the quotes and proposals applications, you may choose to have the detail from your quote populate your schedule of values.

JCE – Cost Entry

Cost entry has the capability to import information right to JCE. Only Job Cost is affected.

QPE – Quote Entry

Quote entry has the capability to import to the Line Items detail screen. The system can accept a spreadsheet with the following information. QBT #, Reference, Item Number, Scope of Work, Manufacturer, Style, Color, Color#, U/M, Quantity, Cost, Freight.

IIM – Inventory Import

Inventory – Roll Inventory application accepts a spreadsheet of material currently sitting in your warehouse. Used generally when first getting the inventory set up.

ADB – Address Book

Using the new **System Imports**, STRUCTURE can import any and all contacts you have for customers, vendors, employees, and 'other'. Just provide the column letter that holds the information being imported.

ASE – Sales Entry

Can import information directly to the sales entry screen if billing is done outside of STRUCTURE, for example Service Titan. This functionality uses the new **System Imports**.

VVE – Voucher Entry

Daily vouchers can be imported via a spreadsheet. This is generally used for information provided by a credit card company.
