

Retiring JOR, JWW, JJR

The following Report Generator reports found in Job Cost will be deactivated at the end of the first quarter 2024.

JOR – Job Information

JWW – Work in Process

JJR – Single Line

Why?

To clean up the number of programs that provide duplicate information that will need to be converted when STRUCTURE goes to a fully web-based platform.

What can I do to get my reports?

Create the reports you print in JMG, JMW, or JRX.

What are the benefits of using JMG/JMW or JRX?

- Users will have more column choices. More columns will print on one report.
- Flexibility to create your own column choices.
- JMG prints up to 16 columns. JWW prints 12 columns. Less columns to accommodate the decimal place for each column.
- JRX can print ALL columns. It is strictly an export to Excel.
- JRX is customizable with new RTC tool. Call Support if looking for something more.
- All are available via JMF for month end processing.

How do I know which columns I should choose to get the same information I have always been getting?

Below you will see the list of column choices for the reports and their JMG counterpart.

Call support if you would like some assistance in setting up your reports.

51	Date Last Active	29 Date Last Invoice

JMG offers many more column choices. Example: Net values. Common column choices net of taxes. Custom defined columns. You create your own. Please see the Help on the JMG screen.

If you want to print more than 16 columns on a report, all the choices found in **JMG**, can be found in **JRX-Master Report Export**. Any report setup here will launch directly to Excel with all columns.

JRX, is also compatible with the new custom reporting tool, RTC. This tool allows us to bring in some fields from other applications that may want or need on a report. Cost detail can be available as a drilldown from the summary lines. Looking for something more, send us the specs. We will see what we can do.

Email or call support. We are more than happy to help you set up our existing and some new reports.
